

Willard RC Fun Flyers

The Willard RC Fun Flyers became an Academy of Model Aeronautics 'AMA' sanctioned Club (AMA Charter No. 3839) 15 years ago. The main reason for the clubs existence is to maintain a location where Club Members can go to fly and have fun with their Radio Control Models. We have between 30 to 40 club members during a typical year.

Our flying field is at 4851 Ladow Road about 2 miles south of Willard, Ohio. The field is nearly 4.5 acres of mown grass sitting in the middle of farmland that is planted in either corn or soy beans.

Most of the flying that is done by club members is Sport Flying. The models flown are from all disciplines – Gas or Electric planes of all types and sizes, Helicopters, Jet Turbines, motor gliders, Etc. This year we are going to try combat flying as another club activity.

Typical club activities during the course of a calendar year are an RC Show / Building Contest in early May, Several Club Fun Fly events during the flying season, An AMA sanctioned Fun Fly Event in early September, and a Christmas Party in December.
